

WHMCS Module for XstreamUI

Complete setup guide for the XstreamUI WHMCS billing module

- [WHMCS Billing Module for XstreamUI](#)

WHMCS Billing Module for XtreamUI

Overview

This WHMCS module allows Users to be auto-provisioned instantly for Xtream-UI. It Automates the adding of credits for Reseller's and Users.

Requirements

Requirements are the same as WHMCS.

Requirement Minimum Recommended PHP Version 7.2 Latest 7.3 or 7.4 Release PHP Memory Limit 64MB 128MB**

If you are using shared hosting your provider may be blocking outbound ports. Most Shared hosting providers do this. Contact your hosting provider and get them to open the port that your reseller panel is on. i.e XtreamUI default port is 25500 unless this has changed get them to open the port. Most providers will open the port.

We have our own CPanel servers that will work out of the box. [click here for pricing](#)

Installation and Configuration

Downloading and Uploading

In this tutorial we will show you how to successfully install ProjectX For XtreamUI.

We will guide you step by step through the whole installation and configuration process.

1. Log in to our client area and download the module.

Latest Download

ProjectX XUI for WHMCS v7 & v8 (v1.2)
XUI
PHP-7.1_to_PHP7.4

 Download Now

2. In the downloaded file you might find one or two packages that support different PHP versions.

In the most recent versions of the module, you will find only one package that supports PHP 7.2 and later.

 ..		23.08.2020 15:29:05
 PHP71_TO_PHP74.zip	8 446 KB	23.08.2020 15:29:05

3. Extract the package and upload its contents

addoonxtreamresell will be uploaded to whmcs/modules/addons **xtreamresell** will be uploaded to whmcs/modules/servers

The content of the package to upload should look like this.

Name	Size	Last Modified	Type	Permissions
 addonxtreamresell	4 KB	Mar 19, 2019, 1:47 PM	httpd/unix-directory	0775
 bulkpricingupdater	4 KB	Feb 25, 2021, 6:30 PM	httpd/unix-directory	0755

Addons

This is where you can activate and manage add-on modules in your WHMCS installation. Older legacy modules will still allow you to activate/deactivate and configure access rights, but will not be able to show any configuration options, version or author information.

Module	Version	Author	
» XtreemResell licensing Manager This add-on allows you to License the XtreemResell provisioning Module	1.0	XtreemResell	<input type="button" value="Activate"/> <input type="button" value="Deactivate"/> <input type="button" value="Configure"/>

License key	<input type="text" value="leased-c"/>
Access Control	Choose the admin role groups to permit access to this module: <input checked="" type="checkbox"/> Full Administrator <input type="checkbox"/> Sales Operator <input type="checkbox"/> Support Operator

How to Configure

8. Enable "Attempt to load all files" in "Encoded File Loading" by doing this. Click "System Settings" > "General Setting" > "Other" and check the box "Attempt to load all files".

Client Details Change Notify	<input checked="" type="checkbox"/> Tick this box to send an email notification to admins on user details change
Show Cancellation Link	<input checked="" type="checkbox"/> Tick this box to show the cancellation request option in the client area for products
Monthly Affiliate Reports	<input checked="" type="checkbox"/> Tick this box to send Monthly Referrals Reports to Affiliates on the 1st of each month
Banned Subdomain Prefixes	<input type="text" value="mail,mx,gapps,gmail,webmail,cpanel,whm,ftp,clients,billing,members,login,accounts,access"/>
Encoded File Loading	<input type="radio"/> Do not load files encoded with IonCube for unknown PHP targets <input checked="" type="radio"/> Attempt to load all files
Display Errors	<input type="checkbox"/> Tick to enable Displaying PHP Errors (Not recommended for production use)
Log Errors	<input type="checkbox"/> Tick to enable logging of PHP Errors when possible (Not recommended for daily production use)
SQL Debug Mode	<input type="checkbox"/> Tick to enable logging of SQL Errors (Use only for testing purposes)
Hooks Debug Mode	<input type="checkbox"/> Tick to enable logging of Hook Calls (Use only for testing purposes)

9. In order to create and configure a product, go to 'System Settings' → 'Products/Services'.

10. Click "Create New Group" and click save.

11. Click "Create a New Product".

Details Pricing **Module Settings** Custom Fields Configurable Options Upgrades Free Domain Other Links

Payment Type Free One Time Recurring

No
Allow Multiple Quantities Yes - Multiple Services: Each unit represents its own individual service instance
 Yes - Scaling Service: Each service instance allows a quantity to be defined

Recurring Cycles Limit To limit this product to only recur a fixed number of times, enter the total number of times to invoice (0 = Unlimited)

Auto Terminate/Fixed Term Enter the number of days after activation to automatically terminate (eg. free trials, time limited products, etc...)

Termination Email Choose the email template to send when the fixed term comes to an end

Prorata Billing Tick this box to enable

Prorata Date Enter the day of the month you want to charge on

Charge Next Month Enter the day of the month after which the following month will also be included on the first invoice

14. If the product is for a free trial you would use the above settings. "Auto Terminate/Fixed Term" is the number of days to auto terminate the product. If its a 24 hour trial you would set that to 1 and 2 for 48 hours. Leave that as 0 for Paid Subscriptions.

Field Type Text Box

Description **Enter your Username for your service (Required)** The explanation to show users

Validation Regular Expression Validation String

Select Options For Dropdowns Only - Comma Separated List

Admin Only **Required Field** **Show on Order Form** **Show on Invoice** Delete Field

22. In the next tab "Custom Fields". in the field "Field Name" enter "Username" NOTE: Its starts with a capital U. If the line is for a mac you would enter "MAC" here. NOTE: All in capitals.(if you are setting up a mac in the previous step you would select "official_mac or trial_mac from the "line

Type" drop down box.

If you want the user to choose their own username you would check all three boxes. "Required Field" "Show on Order Form" "Show on Invoice".

If you selected "Random Username" in the previous section you will only check. "Required Field" "Show on Invoice"

If you want to use the password generated by XUI make sure in the previous section you have not checked "Random Username" and select "Required Field" "Show on Invoice" here.

23. Click "save" your product has now been setup.

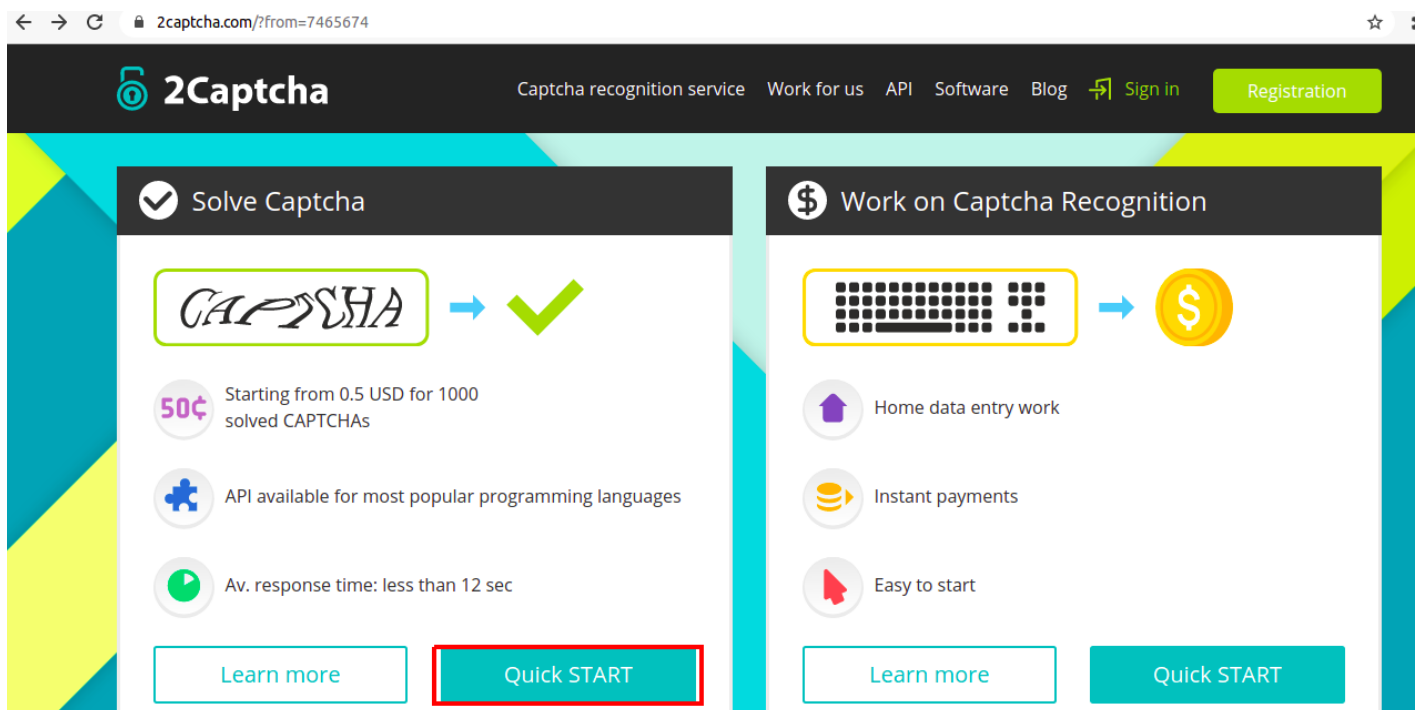

Working with captchas

ProjectX for XtreamUI has the ability to solve Captchas should your panel be protected by one. Please complete the following.

24. Register with 2captcha here and add credits. Prices are very reasonable. Starting from 0.5 USD for 1000

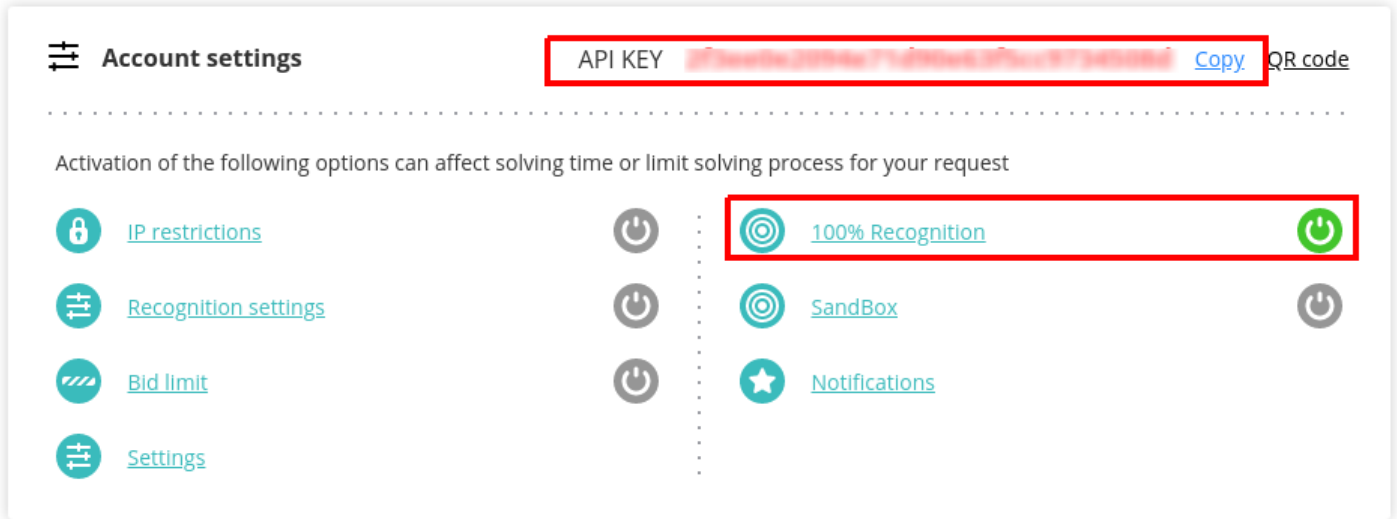

solved CAPTCHAs

<https://2captcha.com?from=7465674>

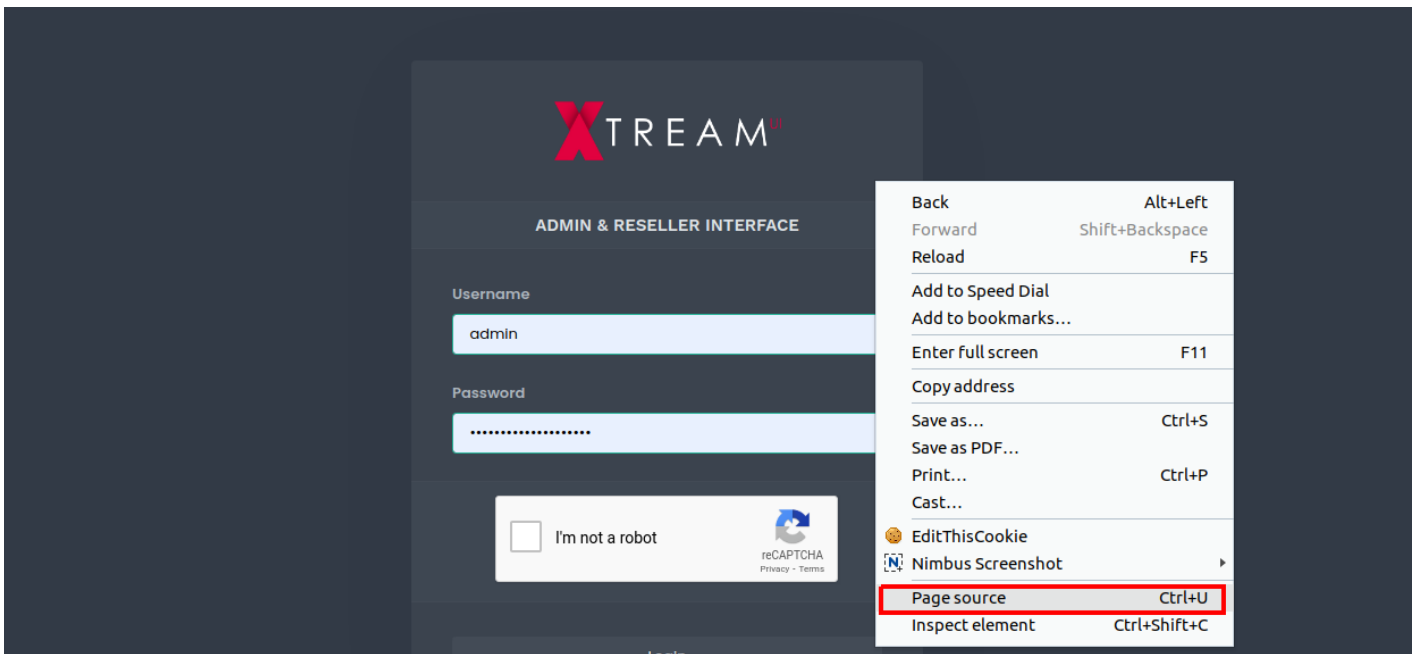

The screenshot shows the 2Captcha website interface. The top navigation bar includes the 2Captcha logo, a navigation menu with links for "Captcha recognition service", "Work for us", "API", "Software", "Blog", "Sign in", and a "Registration" button. The main content is divided into two columns. The left column, titled "Solve Captcha", features a visual of a captcha being solved (the word "CAPTCHA" in a distorted font) with a green checkmark. Below this, it lists key features: a price of 50¢ per 1000 solved captchas, API availability for most programming languages, and an average response time of less than 12 seconds. At the bottom of this column are "Learn more" and "Quick START" buttons. The right column, titled "Work on Captcha Recognition", features a visual of a captcha grid with a dollar sign icon. Below this, it lists features: "Home data entry work", "Instant payments", and "Easy to start". At the bottom of this column are "Learn more" and "Quick START" buttons. The "Quick START" button in the left column is highlighted with a red border.

25. Once Signed up go to your dashboard and copy your "API Key" and enable "100 recognition".

26. Go to your panel login screen and "right click" anywhere on the page and click "Page Source".

27. look for data-sitekey="*****" You will find this near the bottom.

```

<form action="./login.php" method="POST" data-parsley-validate="" id="login_form">
<input type="hidden" name="referrer" value="" />
<div class="form-group mb-3" id="username_group">
<label for="username">Username</label>
<input class="form-control" autocomplete="off" type="text" id="username" name="username" required data-parsley-trigger="change"
placeholder="Enter Your Username">
</div>
<div class="form-group mb-3">
<label for="password">Password</label>
<input class="form-control" autocomplete="off" type="password" required data-parsley-trigger="change" id="password"
name="password" placeholder="Enter Your Password">
</div>
<div class="g-recaptcha" id="verification" data-sitekey="*****"></div>
</div>
<div class="form-group mb-0 text-center">
<button class="btn btn-danger btn-block" type="submit" id="login_button">Login</button>
</div>
</form>

```

28. Now to go to your module settings. In the field "Captcha API Key" put the api key from 2captcha. In the "G-Recaptcha Key" put the key you copied from your Panel page source. Check the box "Captcha Required" and Check the box "Refresh" and click save. NOTE: You only click

"Refresh" once. This will force ProjectX to login to your panel to get your products. This could take up to a minute to complete. If nothing has happened by then just close go back to "products and services" and reopen the module again. Refresh should auto uncheck once your products have been retrieved.

The image shows two side-by-side configuration panels. The left panel is for 'Random Username' and the right is for 'Random Password'. Both panels have a checkbox for 'Generate a random numeric username/password' which is unchecked. In the 'Random Username' panel, the 'Captcha Required' checkbox is checked, and the 'G-Recaptcha Key' field contains a key value. In the 'Random Password' panel, the 'Captcha API Key' field contains a key value, and the 'Refresh' checkbox is unchecked. Below these panels is a section with radio button options for automatically setting up products.

Random Username Generate a random numeric username. For this function to work you should uncheck show on Order Form in Custom Fields for Username and clear any Validation strings

Captcha Required Enable if Site Is protected by a Captcha

Troubleshooting

I can't see my products in the module settings.

If you are using shared hosting your provider may be blocking outbound ports. Most Shared hosting providers do this. Contact your hosting provider and get them to open the port that your reseller panel is on. i.e XtreamUI default port is 25500 unless this has changed get them to open the port. Most providers will open the port.

We have our own CPanel servers that will work out of the box. [click here for pricing](#)

My licence has expired but its a valid license

In Whmcs go to "System Settings" > "Addon Modules".

Click Deactivate.

Click Activate.

Click Configure. Paste your License Key in again, Check the box "Full Administrator" and click Save. (Don't miss a step).
